COMPAQ

Read Before Installing or Using Compaq DCE for OpenVMS VAX and OpenVMS Alpha Version 3.0.

AV–QMC5D–TE

Please take the time to read the following information about your product.

SOFTWARE INFORMATION

Compaq DCE for OpenVMS VAX and OpenVMS Alpha Version 3.0 is a new release that replaces Digital DCE for OpenVMS VAX and OpenVMS Alpha Version 1.5. *Version 3.0 is a complete kit that does not require a previous version of Compaq DCE for OpenVMS for installation.* Version 3.0 can be installed in a new system or can be installed as an update to a previous version of DCE for OpenVMS. Refer to the *Compaq DCE for OpenVMS VAX and OpenVMS Alpha Release Notes* for information about this release.

	Alpha Systems	VAX Systems
Kit Name	DCEAXP030	DCEVAX030
Old Product	Digital DCE for OpenVMS Alpha V1.5	Digital DCE for OpenVMS VAX V1.5
New Product	Compaq DCE for OpenVMS Alpha V3.0	Compaq DCE for OpenVMS VAX V3.0
Approximate Block Size	80,000	58,000

All Version 1.5 documentation has been updated for Version 3.0.

LICENSE INFORMATION

If you are installing the Compaq DCE for OpenVMS Runtime Services Kit, you do not need a separate license. The right to use the Runtime Services Kit is included as part of the OpenVMS operating license.

However, if you are installing the Compaq DCE for OpenVMS Application Developer's Kit, CDS Server Kit, or Security Server Kit, you must first register a License Product Authorization Key (License PAK) using the License Management Facility (LMF). The License PAK can be shipped along with the kit if you ordered the license and media together; otherwise, it is shipped separately to a location based on your license order. If you are installing Compaq DCE for OpenVMS as an update on a node or cluster already licensed for this software, you have already completed the License PAK registration requirements. See the *OpenVMS License Management Utility Manual* for registration instructions.

The DCE Privacy kit has been retired, and that functionality has been combined into the base DCE kit. You now can use packet level privacy without a separate kit or license.

INSTALLATION INFORMATION

Installing Compaq DCE for OpenVMS Version 3.0 requires one of the following:

- OpenVMS VAX Version 6.2 or higher
- OpenVMS Alpha Version 6.2 or higher

If you are installing Compaq DCE for OpenVMS from disk files or CD-ROM, start the installation procedure as follows:

1. Log in to the account from which you are installing the kit.
2. Stop any currently running version of DCE. See the *Compaq DCE for OpenVMS VAX and OpenVMS Alpha Installation and Configuration Guide* for important details on shutting down different versions of DCE.
3. Mount the media on the appropriate device.
4. Run the DCE$INSTALL.COM procedure as follows, substituting the correct name of your media device for DKA300, and choosing the correct directory for your type of system:

```
$ @DKA300:[DCE.DCEAXP030]DCE$INSTALL
```

RELEASE NOTES INFORMATION

The release notes for Compaq DCE for OpenVMS Version 3.0 contain important installation-related instructions and a summary of technical changes, new features, differences, known problems, corrected errors, restrictions, and incompatibilities.

Note: The release notes also contain important information about system and process parameters and quotas. These parameters and quotas may require adjustments depending on the number of DCE users.

After you install Compaq DCE for OpenVMS, you can find the release notes in:

```
SYS$HELP:DCE030.RELEASE_NOTES
```

DOCUMENTATION

The DCE for OpenVMS Version 3.0 CD-ROM contains PostScript and text files of the Compaq DCE for OpenVMS documentation.

Table 1 lists the Compaq DCE for OpenVMS files contained in [DOCUMENTATION.POSTSCRIPT], the directory for printable documentation.

Table 1: Printable Documentation for Compaq DCE
