AV-QRJPE-TE

October 2001

Dear Compaq RAID Software for OpenVMS Customer:

Thank you for your recent purchase of the Compaq RAID Software. The kit you have just received includes the VAX and Alpha versions of Compaq RAID Software V2.5 for OpenVMS. This software is compatible with OpenVMS VAX Versions 5.5-2, 6.2, 7.1, 7.2 and 7.3 OpenVMS Alpha Versions V6.2, 7.1-2, 7.2-1, 7.2-2 and 7.3.

OpenVMS VAX version 5.5-2 will no longer be qualified with RAID software beyond this release.

Compaq RAID Software for OpenVMS was formerly named StorageWorks RAID Software for OpenVMS.

This product will operate in mixed OpenVMS cluster environment. Some of the new features in this release are:

— Qualified with versions 7.3 and 7.2-2.

— Support for Shadowing minicopy feature. (refer to release notes)

— Includes all ECO's released since V2.4A/-V2.4-7 (refer to release notes)

Please refer to the release notes found in the software kit savesets for details. The RAID025 kit you have received is a full release (approximate block size =14,000 for the application and =9,000 for documentation). This media kit includes:

- Compaq RAID Software for OpenVMS, Version 2.5 Savesets
- Compaq RAID Software for OpenVMS, Version 2.5 Cover Letter
- Compaq RAID Software for OpenVMS, Version 2.5 Installation Guide
- Compaq RAID Software for OpenVMS, Version 2.5 Guide to Operations
- Compaq RAID Software for OpenVMS, Version 2.5 SPD 46.49.08

RAID Software V2.5 is only available on the OpenVMS Software Product Libraries distribution for Alpha and VAX.

Sincerely,

OpenVMS Product Management
