Read Before Installing Compaq TDMS™ Version 1.9B for OpenVMS™ VAX™ Systems

Whether you are a new or existing *Compaq TDMS for OpenVMS VAX* customer, please take time to read the following information about your product.

New Service: Mature Product Support (MPS)

The Mature Product Support with Sustaining Engineering Service is offered for this product and includes telephone support, tested software patches for any new problems, and problem escalation to engineering-level resources if appropriate. This support offering is equivalent to current version support. Compaq will not be adding new features or functionality to this product and no new releases are planned. Accordingly, License Subscription and Software Update Distribution Services are no longer available.

Please contact your local Compaq Services Sales Specialist for more information about the Mature Product Support with Sustaining Engineering Service.

Installation Information

Installing TDMS Version 1.9B requires *Compaq OpenVMS VAX* Versions 5.5-2, 6.2, V7.1, or higher and Oracle® CDD/Repository Version 5.3 or higher.

To install TDMS, invoke the VMSINSTAL command procedure, as outlined in Chapter 3 of the *OpenVMS System Manager's Manual*, and then follow the instructions in the *VAX TDMS Installation Guide*. The installation procedure will perform a complete replacement installation.
