COMPAQ

Compaq DECwrite for OpenVMS

Dear Customer,

Thank you for purchasing the Compaq *DECwrite for OpenVMS American English and British English*, Version 3.1A software product (DECwrite).

Features

DECwrite is a compound document processing application that combines word processing, publishing, color text and graphics creation, data-driven charting, image integration, audio annotation, and LiveLink connections to supported applications and data. For complete information about the product, refer to the Compaq *DECwrite for OpenVMS American English and British English* Software Product Description (SPD 25.F7.06).

There are no functional changes between DECwrite Version 3.1 and DECwrite Version 3.1A. However, DECwrite Version 3.1A is the minimum version required to work with the OpenVMS VAX and Alpha Operating System Version 7.3 and/or Compaq DECwindows Motif for OpenVMS Version 1.2-6 or higher.

Documentation

The Compaq DECwrite for OpenVMS software documentation set includes the following manuals:

- *DECwrite User's Guide, Version 3.0* (January 1994)
- *DECwrite Installation Guide for OpenVMS Systems, Version 3.0* (January 1994)
- *DECwrite Release Notes for OpenVMS Systems, Version 3.1* (September 1995)
- *DECwrite Quick Reference Card, Version 3.1* (September 1995)

The manuals listed above are current for this release of the product.

All of the documentation except the DECwrite Quick Reference Card is available in online format as part of the OpenVMS Online Documentation Library on CD-ROM. A PostScript version of the DECwrite Quick Reference Card is placed on your system during the installation. Please see the DECwrite Release Notes for additional information. DECwrite documentation is not available in hardcopy format.

Installation

Please read the DECwrite Installation Manual for OpenVMS Systems and Release Notes before installing DECwrite. These documents contains important information that will help you configure DECwrite for optimum performance on the system.
