Read Before You Install: DIGITAL DECintact Version 3.0B for OpenVMS

AV-LW27G-TE

Description

The DIGITAL™ DECintact ™ Version 3.0B product release delivers the following:

- Maintenance for problems reported since the last product release, details of which are identified in the DECintact V3.0B Release Notes.
- A description of Year 2000 compliance

  DECintact has been tested by DIGITAL and declared as functionally Year 2000 ready. However, depending on how an application has been coded to use DECintact's date manipulation routines, some year 2000 issues at the application level may arise. Please refer to the Release Notes for a detailed description of DECintact's Year 2000 Readiness and related information that you should be aware of.

Installation Information

The DECintact *Supplemental Information and Installation Guide* outlines the specific steps for installing DECintact on the OpenVMS Alpha platform. It also identifies changes that apply to the existing documentation set and new information pertaining to DECintact.

Read the DECintact *Supplemental Information and Installation Guide* and the DECintact Release Notes for any specific restrictions that may apply to your environment.

Release Notes

The release notes for DECintact Version 3.0B contain the details of the items addressed with this release and the Year 2000 Readiness statement. They also include a summary of late breaking information, such as known problems, restrictions and installation-related instructions.

After you install DECintact, the release notes can be found in:

```
SYS$HELP:DECINTACTB030.RELEASE_NOTES
```

For information on accessing the release notes before installation, refer to the DECintact documentation set.
