OpenVMS™ SNA

AV-JQ86G-TE

Dear Customer,

Thank you for purchasing the OpenVMS™ SNA Version 2.3 software product. This package contains the OpenVMS SNA V2.3 software and documentation. Check the bill of materials to be sure your distribution kit contains all the items listed. If any of the items are missing or damaged, please contact your DIGITAL™ representative.

Before installing the product, please take a few minutes to read the OpenVMS SNA software release notes. You can find the release notes on the distribution disk in the directory SYS$HELP:SNAVMS$023.RELEASE_NOTES.

For complete information about the product, refer to the OpenVMS SNA Software Product Description (SPD 27.01.10).

Features

OpenVMS SNA is a layered software product that allows OpenVMS VAX™ systems to communicate with IBM® systems using the IBM System Network Architecture (SNA) protocols.

New features for Version 2.3 of OpenVMS SNA include the following:

- OpenVMS VAX V6.1 and V7.2 support
- Support for remote DECnet™ client applications

Documentation

The OpenVMS SNA software documentation set includes the following manuals:

- *OpenVMS SNA Installation*
- *OpenVMS SNA Management*
- *OpenVMS SNA Guide to IBM Parameters*
- *OpenVMS SNA Problem Solving*

Documentation is available in online format as part of the OpenVMS VAX Online Documentation Library on CD-ROM (the Problem Solving manual is available only in hard copy at this time). If you need to order any additional documentation, please contact your DIGITAL sales representative or refer to the ordering information in the *Software Documentation Products Directory*.
