Order No: AV-QBG8A-TE

BEFORE YOU INSTALL Asian DEC Datatrieve Version 6.1

Perform the following steps before installing Asian DEC Datatrieve on your Asian OpenVMS operating system:

1. Read the Bill of Materials (BOM) enclosed in the transparent plastic envelope. Check to see if all listed items are in the kit. If any item is missing, contact your Digital representative.
2. For Asian DEC Datatrieve V6.1 for OpenVMS AXP, ensure that you have Asian OpenVMS AXP V1.5 installed on your system.

   For Asian DEC Datatrieve V6.1 for OpenVMS VAX, ensure that you have Asian OpenVMS VAX V5.5-2 or higher installed on your system.
3. Ensure that you have the correct Product Authorization Key (PAK) registered and loaded before you install Asian DEC Datatrieve. Otherwise, the IVP will fail.
4. Ensure that Common Data Dictionary software is installed on your system:

   Asian DEC Datatrieve V6.1 for OpenVMS VAX requires that V5.0 or higher of Common Data Dictionary be installed.

   Asian DEC Datatrieve V6.1 for OpenVMS AXP requires that V5.3 or higher of Common Data Dictionary be installed.
5. Read *Asian DEC Datatrieve Release Notes* for Asian new features since the previous version (V5.0).
6. Asian DEC Datatrieve is a customer-installable software product. To install the product, you need to read the installation guide carefully for important information such as prerequisite software, installation procedure, pre-installation preparation, post-installation tasks, and VMScluster considerations.

7. If you are to install DEC Datatrieve/Hanzi V6.1 for OpenVMS/Hanzi VAX, ensure that you have the correct installation key.

   To get the installation key, you should contact one of the following Digital's PRC service stations:

   Shanghai Service Station
